PROFILE

Information Technology student at Madhuben & Bhanubhai Patel Institute of Technology with hands-on academic project experience in frontend development, Python programming, voice-to-voice translation, file handling, and secure file protection systems. Skilled in building clean, responsive, user-friendly interfaces and practical software solutions using HTML, CSS, JavaScript, and Python, with a growing interest in web development, security concepts, and real-world project implementation.

EDUCATION

B.Tech in Information Technology

Madhuben & Bhanubhai Patel Institute of Technology, CVMU, Gujarat | **Current CGPA: 7.79** (Till 5th Semester)

Higher Secondary School

A.J. High School, Vaso | **Percentage: 56.5%**

Secondary School

Bhakti Vedant High School, Deva | **Percentage: 79.8%**

TECHNICAL SKILLS

- **Web Technologies:** HTML5, CSS3, responsive design, flexbox, grid, transitions, animations, clean webpage layout
- **Programming language:** C, C++, Python, JavaScript,
- **Tools:** GitHub, VS Code
- **Concepts:** DS, Data Analysis and Algorithms, AI
- **Core Subject:** Web Development, AI, python
- **Soft Skills:** Problem solving, adaptability, continuous learning, teamwork

PROJECTS

Voice-to-Voice Translation System (*Python + Frontend UI + Speech Processing*)

- Developed a translation application designed to convert spoken input into translated voice output for multilingual communication.
- Added support for audio file upload and text file translation to make the project useful for academic demonstration and practical use cases.
- Designed a user-friendly interface flow with clear input/output handling for voice, text, and uploaded files.
- Applied Python programming, file handling, frontend UI concepts, and speech-processing logic to build an end-to-end translation workflow.

Secure File Protection System (*INS + MFA + Encryption/Decryption*)

- Built a security-focused project based on Information and Network Security concepts to protect real user files.
- Implemented multi-factor authentication to improve access control before file encryption and decryption operations.
- Supported encryption and decryption for multiple file types including audio, document, image, and text files.
- Used file handling and security logic to create a practical protection system for sensitive digital data.

CERTIFICATION

- IBM SkillsBuild - AI Tutorial: Completed introductory artificial intelligence learning resources and gained exposure to basic AI concepts.
- BE10X - AI Tools Workshop: Completed an AI Tools and ChatGPT workshop focused on AI-powered presentations, data analysis, coding, and debugging techniques.

ACADEMIC ACTIVITIES

- Created academic projects combining frontend development, Python programming, file upload handling, and security concepts.
- Practiced clean UI design, responsive layouts, readable code structure, and project-based learning through portfolio development.
